Company Information

Established in 2002, IRT Surveys Ltd. is an ITC certified and UKTA registered thermal imaging company with extensive experience in the construction industry and 5 years Research & Development experience.

Our management team includes Stewart and Alan Little, world renowned computer programmer David Jones and Europe's largest sustainable fund manager Sigma Technology.

With worldwide coverage from our base in Scotland, IRT specialise in non destructive testing of buildings and provide an independent consultation and full survey service.

Our clients benefit from the latest technology and impartial advice from our highly skilled team of thermographers who are trained to at least Level 1 Thermography Standards by the Infrared Training Centre. In addition our staff are suitably qualified in either science, construction, architecture or environmental disciplines.

We pride ourselves on our service. As part of this we have Professional Indemnity Insurance of £1million, Employers liability of £10million and Public liability of £2million.

Call us now on **01382 228 700** to arrange your survey.

Our services include:-

- » Infrared thermographic surveys
- » Energy Efficiency surveys
- » Leak Detection
- » 3D Modelling
- » Elevated imaging
- » Air Leakage Testing
- » Ground Penetrating Radar surveys

IRT are also ITC registered trainers and can provide training at our new state of the art training facility in Dundee. Courses include Building Thermography, ITC Level 1, Energy assessments and many more.
